Min Approved For Release 2000/08/10: CIA-RDP36-00791R0001002300031-2 36" len 7. It has a har ble armed it is dials or circles on its surface (see drague page 4). It has the appearance of brush l'estal. It is another inconsistency in that I feel that it can "sense" as well as generate alternately. Spherial objects (considered and work) are musil the cabin. There is a rock for parigation chartest caylinders. The 4th from the night is somehow significant. Is it a lighter color. There is could tubing or hoses. There is a sense of extra autennas when present which appear as "quide "lines or non functional wries. Min vessel has been remodeled. The walls i/or floors One individual has a pistal or board. There are consuspecting passengers on board - They are pot awar of priserce of contrabal or activity in progress. Destination was to contain for much Auc. The shoulties "MAL..." or "MEL..." were perceived. Ack par derived Names included California, Los Angeles, Tabol, Las Vegas, Keno, Menlo Park & Palo Alto. An individual who is a compet or fabric distribution is muchal with their activity. I sense flist this way be the method by which the stiff is distributed.
